

Duct cable(III)

Application:

The Mincable are suitable for installation in duct environment for metropolitan network, access network, especially for air-blown installation. They are also suitable for high voltage and low voltage crossing route.

Features:

- Up to 24 fibers
- Non metallic construction providing excellent lightning strike resistance.
- Aramid yarns armor providing excellent strain performance.
- Flexible, light weight provides ease of installation.
- Compact structure, super small outer diameter.

Technical data:

Fiber Num.	Outer diameter (mm)	Weight (kg/km)	Min. Bending radius (mm)		Tension(N)		Crush loading (N/100mm)	
			Static	Dynamic	Short term	Long term	Short term	Long term
2-12	5.0	24	20 times O.D.	40 times O.D.	240	120	1000	300
14-24	5.8	30			300	150
